15 ps.

B. Give the appropriate and specific term for *classifying* devices and equipment according to the definitions and related examples given below.

1. a machine or piece of equipment, esp. an electrical one used in the house
(*egs.: cooker, refrigerator*):

2. a piece of equipment which you use with your hands to make or repair things
(*egs.: screw driver, saw*):

3. a device used for measuring speed, height, etc or for performing delicate and precise work
(*egs.: compass, microscope, speedometer*):

3 ps.

C. With the help of the example statements given, find the appropriate terms which describe material or object *properties* according to the definitions below.

1. able to last a long time without becoming damaged:
[*eg.: Melamine boards aren't as _____ as wood or polythene. They wear out faster and, as they do so, they can also absorb bacteria.*]

2. objects that can be arranged and/or stored in an ordered pile:
[*eg.: One more good thing about this hi-fi system is that it's _____, so you don't need to place each piece one next to the other, nor do you need more than one shelves.*]

2 ps.

D. Name the following angles marked and find the words for the dimension indicated on the fourth shape.

1.  _____

2.  _____

3.  _____

4.  _____

4 ps.

E. Express the following numbers in words, according to what is indicated in brackets.

N.B.: - if any of the numbers is expressed differently in *British and American English*, either would be acceptable provided you indicate which language you are using!
 - for the *Time*, give the conventional, analog way of telling it.
