

Augmented Reality

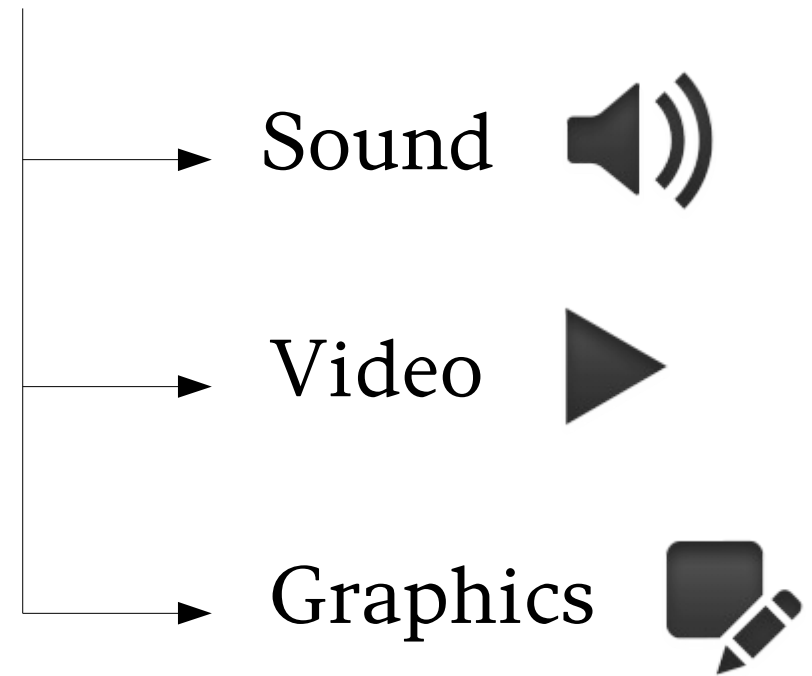

Κόλλιας Πάυλος - dpsd10032

What is AR?

real-world
environment

computer-generated
sensory input

Technology

•Processor

- Head-mounted display (HMD)
- Handheld
- Spatial

•Display

•Sensors

•Input Devices

- Digital Camera
- Accelerometer
- GPS
- Gyroscope
- Solid State
Compass
- Radio-frequency
identification(RFID)

Applications

Navigation

Task Support

Applications

Business Cards

Print Media

Applications

Commerce

Education

Applications

Gaming

Wayfinding
