

ENGLISH IV

SPRING SEMESTERS 2009-2012

PRESENTATION TOPICS:

1. ***“Present an innovative mechanism, system, piece of equipment, construction, etc.
The following aspects should be discussed:***
 - *its parts and components*
 - *the way in which they are connected or attached to one another*
 - *the materials used and their properties*
 - *the principle on which its function is based (how it works)*
 - *the purpose it is aimed for and/or any possible applications”*

2. ***“Select (or design) a system (related to the domains of communications or information technology, or any other domain), or an innovative mechanism, piece of equipment, construction, etc. and present it.
The following aspects should be discussed:***
 - *its parts and components*
 - *the technology involved*
 - *the materials used and their properties*
 - *the principle on which its function is based (how it works)*
 - *the purpose it is aimed for and/or any possible applications”*

Note 1: an on-screen presentation is imperative

Note 2: students can have the main points of their presentation in **note form** (e.g. bullets), but NO text is allowed (it would be advisable to present the same notes/main points on screen). Also, students should use THEIR OWN WORDS in communicating information from the sources consulted.

Note 3: the students who deliver a presentation are expected to explain to their audience in plain English any difficult word or specialized term they may use!

Note 4: the sources should also be mentioned
